

DAMUTH TRANE EMERGENCY PLAN

Damuth Trane is dedicated to partnering with our clients to ensure minimal disruption to your business in the event of an emergency. We have a comprehensive emergency management plan that provides plans to assist you, should you be impacted by a crisis.

Safety is one of our core values and we demonstrate that commitment by first ensuring that our teams are safe and secure, and then being ready to respond to help our local community.

Priority 1

The first responsibility of Damuth Trane Associates is to maintain their own safety; only then can they help others.

Priority 2

After official clearance from local and state authorities, we will focus on assisting emergency “first response” units. The order of priority is:

- Fire/Police/Emergency Response/Healthcare Facilities
- Utility Providers
- Telecommunication Facilities
- Local Media Outlets

Priority 3

Service calls that address the following:

1. Damuth Trane clients under service contract
2. Service calls involving equipment start-ups, panel replacements, and general evaluation of mechanical equipment.

IS YOUR FACILITY PREPARED?

We encourage you to take time to plan now for expected and unexpected downtime. We can help you develop a contingency plan to identify potential HVAC system and power failure scenarios and develop solutions to minimize operation interruptions. Also, utilize local and state resources to help with planning.

AFTER AN EMERGENCY: CALL OUR MAIN NUMBER (757) 558-0200

Damuth Trane's operational status. We have made provisions to ensure this number remains operational even if power and telephone service is lost to our office building. The receiver of the call will provide information needed to place a service call or reach our parts locations.
